Experience

2025 - 2026	Senior Software Engineer in Codeboard - InfrasaI - Rescued a critical legacy React insurance platform, clearing a backlog of 100+ Jira tickets in 3 months and restoring 100% client satisfaction. - Received personal commendation from the client's CEO and a "Vendor Excellence" award for exceptional technical leadership and project turnaround. - Collaborated with the leadership team to design and build technical POCs that addressed specific prospect pain points, leading to a significant increase in client conversions. - Won 2nd prize in a corporate hackathon for a zero-downtime environment migration POC Template Comparison Tool, which became very usefull when migrating all the things between environments like DEV, QA , STAGE, PROD. - Awarded the "Third Eye" title for voluntarily conducting an engineering session on Attacking and Hacking LLMs.
2021 - 2025	Lead developer in Yes Or Yes (4+ years) - Started as intern, now leading the team. - Experienced in managing projects from conception to completion. Responsibilities: - Analyzing client requirements and developing technical solutions - Providing accurate project timelines and effort estimations - Collaborating with design and SEO teams for integrated solutions - Leading and mentoring development team members - Making key technical decisions for project architecture - Ensuring quality delivery and project completion - Providing ongoing maintenance and support

Skills

Frontend	NextJs, ReactJs, Astro, Tailwind, Typescript, Gsap, Motion
Backend	NodeJs, Python (FastAPI / Django), HonoJs, Redis, Nginx, GraphQL
Databases	MongoDB, Postgres, GraphDB, VectorDB
Cloud	Google Cloud, AWS, Git, CI/CD (Jenkins), Docker
Architectures	Microfrontend, Monorepo, Distributed Systems, Clean Architecture, Microservices

Projects

Transamerica Medical Insurance Form (Enterprise application)

- Complex medical insurance form processing platform developed with ReactJs Microfrontend architecture. Forms will dynamically change questions based on the user answers and will have complex validation rules. The form data will be synced to the backend in real time and the user can save the form and continue later.

Template Comparison Tool (Enterprise application)

- Complex comparison tool developed with ReactJs Microfrontend architecture. This tool will compare the templates of different environments like Dev, QA, Staging and Prod and will show the differences in a user friendly way and it became very useful in the migration process.

Sportkingfashion (Ecommerce) <https://sportkingfashion.com>

- Complete ecommerce platform with custom dashboard, Razorpay payment integration, Unicommerce syncing, bulk upload capabilities, inventory management, and custom authentication.
- Developed from scratch using clean architecture principles.
- Implemented CI/CD with GitLab actions for automated deployment.
- Built with NextJs, HonoJs, MongoDB, Redis, Mailchimp, Razorpay.

Reffery (Hybrid mobile app) <https://reffery.com>

- Business-focused mobile application developed from scratch and published to App Store and Play Store.
- Awarded **Mountain Mover** recognition for exceptional delivery.
- Built with Ionic, Capacitor, ReactJs, Firebase.

Others

Goal	Aspiring to become Software Architect
Hobby	Learning classical guitar (flamenco style)
